

A leading Europe-based bank with a global customer base

Client Pain Points

Client was facing increasing regulatory pressure and growing volumes of risk alerts. Manual investigations were slow, inconsistent, and resource-intensive, creating compliance risks and analyst fatigue. It needed an automated, scalable risk management solution that could improve detection accuracy while preserving human oversight.

Solution Offered

Genpact deployed an advanced risk management solution using AI-powered agents to analyze transactions, account activity, and historical data. The platform unified fragmented information into a real-time view, automated routine analysis, and delivered contextual insights for faster, more consistent decisions, with human oversight ensuring compliance and governance.

Value Delivered

- ❑ Faster and more accurate risk investigations.
- ❑ Reduced manual effort and improved analyst efficiency.
- ❑ Consistent and auditable decision-making.
- ❑ Enhanced detection of suspicious activity across operations.
- ❑ Scalable risk management processes with stronger compliance oversight.
