

A reputed global food and beverage manufacturer

Problem Statement

Client was struggling to reduce the cost per order while enhancing customer and user experiences. It faced challenges in optimizing its order management processes, including limited visibility into order fulfillment, difficulty handling exceptions efficiently, and prioritize orders intelligently. Client wanted a solution that could improve operational efficiency and provide actionable insights across its order lifecycle.

How Genpact Helped

Genpact collaborated with the client to create a custom intelligent automation solution that improved order visibility, prioritized fulfillment, and provided smart recommendations for handling exceptions. Our solution streamlined processes and enabled faster, data-driven decisions. Our approach also reduced operational complexity and empowered teams to focus on higher-value tasks, enhancing efficiency as well as customer satisfaction.

Impact Delivered

- ❑ Improved visibility into customer needs through deeper insights and better decisions.
- ❑ Enhanced productivity by streamlining processes and reducing manual effort.
- ❑ Elevated customer experience (CX) with faster, more personalized interactions
- ❑ Increased revenue by identifying opportunities and optimizing performance.
